Mission
The Graduate Program in Allied Health advances knowledge and prepares leaders in diverse health fields who are experts in science for the promotion of health and the prevention of disease for all individuals.

Goals
- Provide an interdisciplinary graduate program that fosters competence through critical thinking and translational research in the dynamic fields of health promotion and disease prevention
- Provide doctoral training within the Department of Allied Health Sciences through the establishment of a graduate program in collaboration with interdisciplinary partners
- Advance knowledge in the allied health sciences through research and scholarship for the promotion of health and prevention of disease
- Prepare graduates to be leaders in the advancement of knowledge and translation of research in the allied health sciences

Who may apply?
The program is open to all students who hold a Baccalaureate degree. Students will ideally enter the program with a degree in a health-related field and/or a strong life sciences background. All previous coursework must meet the requirements of the University of Connecticut Graduate School. Information regarding the general requirements can be found on the Graduate School’s link at www.grad.uconn.edu

What the GPAH program offers...
- Competitive Graduate Research Assistantships
- Competitive Graduate Teaching Assistantships
- Individualized Programs of Study
- Full-time and Part-time Options
- Opportunities for Expanded Role in Health Care

Professional Opportunities
Opportunities for professional development are an integral part of this program. Students may learn grant writing skills, publish in professional journals and present at national meetings. All students are encouraged to collaborate with faculty in pursuit of their scholarly interests. Faculty and students regularly participate in seminars and conferences in the exchange of scholarly ideas and initiatives that stimulate interdisciplinary collaboration in the pursuit of health and health benefits.
